# CHLOE ROBBINS (STUDENT OFFICER)

A vote for Chloe Robbins, is a vote for confidence, change and creativity. A candidate who will work alongside you and have your voice heard.

Hi , my name is Chloe Robbins and I am a first year Criminology with Psychology student. There are so many reasons why I want to be a student officer but the main one is to ensure that those who struggle to have their voices heard can rely on me to support them. If I was elected, I vow to be a representation of those who feel ignored and isolated, I want to stand up for your beliefs , ideas and opinions. My goal is to ensure everyone feels safe and valued at the university, I use to feel as though I was never heard, and I was too shy to share my ideas, it's important to me that no one feels that way , and I can be that person who stands up for others.

My proposals:

- **Freshers for 1st year students who missed out due to the pandemic** - I want to ensure that those who missed out on freshers have some kind of freshers when the pandemic is over . I am currently a 1st year student and it has been a really tough year to start university , and without these events it has been a struggle to make friends due to restrictions. I want to make sure as a year group we don't get overlooked and can have still have these events.

- **Student shop** – I would like to try and bring some new items into the student shop and expand the variety. The shop currently offers a click and collect service on the student union website , but the 'food bundles' are limited, and I feel as though we could update them.

- **Improvements to deliveries**– Often when ordering next day delivery parcels , it takes a longer time to be processed, as a student councillor I will look into the option of having amazon lockers available on campus, this may help increase the speed of next day deliveries.

- **Mental health** - Lockdown has been a test on people's mental health , as a student councillor I will put a big emphasis on mental health and promote the awareness and help available. More services should be made available or made easier , such as things like nightline. I plan to help increase the speed of action taken for those who feel at risk , I would also like to try and create more groups / support systems. Examples would be things like a buddy program , an open blog or support groups.

- **Increase academic support** – I want to set up more workshops to help provide academic support and advice, from lectures, other students and professionals. After reading this year's big survey , I saw a lot of people were asking for academic support , and I want to help provide that.

- **Help hit the 80% mark for student extracurricular** – the current goal for extracurricular activates is to hit 80% satisfaction. I would like to introduce new groups/ activities as well as taster sessions.
